## City Reminding Residents to Follow Careful Cleaning Practices -Do Not Mix Certain Chemicals-

KINGMAN, Ariz. – The City of Kingman is reminding the community that, during this time when people are concentrating on cleaning and sanitizing homes and work areas, there are chemicals people should **never** mix. Some chemical mixtures can lead to serious health issues, and the Environmental Protection Agency (EPA) offers some [helpful cleaning tips, regarding COVID19](#), on their website. Here is a helpful chart:

### NEVER MIX THESE CLEANING PRODUCTS

<b>BLEACH + VINEGAR</b> Bleach and vinegar mixture produces chlorine gas, which can cause coughing, breathing problems, burning, and watery eyes.	 
<b>BLEACH + AMMONIA</b> Bleach and ammonia produce a toxic gas called chloramine. It causes shortness of breath and chest pain.	 
<b>BLEACH + RUBBING ALCOHOL</b> Bleach and rubbing alcohol makes cholroform, which is highly toxic.	 
<b>HYDROGEN PEROXIDE + VINEGAR</b> This combination makes peracetic/peroxyacetic acid, which can be highly corrosive.	 

\*Source: EPA

As of Monday, March 23, 2020, all city buildings (except the Municipal Courthouse, Golf Course, and Parks) will be closed to all public access until **at least** April 6, 2020. City team members will still be onsite working over email and taking phone calls for those customers that need to pay bills, get building inspections, etc. We ask the residents please be patient as hold times for Utility Billing may be increased.
